## Engineering group SEGULA Technologies Brazil to recruit 600 people this year

After celebrating its 20th anniversary a few months ago, SEGULA Technologies Brazil intends to recruit 600 engineers in the coming months to work on value-added projects for its local and international industrial clients.

SEGULA Technologies Brazil currently has more than 800 employees. The teams are located in strategic areas near **Curitiba, São Paulo, Belo Horizonte** and **Rio de Janeiro**, and work alongside more than 30 renowned industrial partners, mainly automakers and major players in the railway and agricultural vehicle sectors, among others.

The Group provides engineering, industrial design and software development services to leading international companies in the automotive, energy, railway, IT, telecommunications, agribusiness and road transport sectors.

To support its growth, **SEGULA Brazil is currently recruiting 600 vacancies for engineers, technicians and skilled workers**, especially profiles in the areas of automotive products and processes, design, embedded software, testing, quality, powertrain, computer-aided engineering, virtual simulation and logistics.

With these hires, SEGULA Brasil is to increase its workforce by an impressive 30 per cent. Through the implementation of an ambitious employee development plan, facilitated by its in-

house training centre, the company is committed to empowering its staff with essential skills to improve their performance.

*"We are looking forward to welcoming hundreds of newly qualified engineers to SEGULA Brazil. By joining us, they will have the opportunity to work on varied, large-scale local and global projects and to deepen their knowledge of all aspects of new technologies. Encouraging diversity in engineering, we strongly encourage women to apply and thrive in our group"*

**- Aldemir Rodrigues, Director of SEGULA Technologies Brazil**
